

KEVIN O'NEILL

SharePoint 2010 Server Farms Architecture

Often in my SharePoint travels – I get asked on what I believe is the best server architecture for a SharePoint 2010 deployment. Usually – my first question is: How many employees and offices are in your organization?

As such the layout below is what I would recommend for a medium size farm of 4000-10000 users:

KEVIN O'NEILL

A smaller organization of less than 4000 – I would recommend this smaller based farm:
